Education

University of Michigan Engineering, Ann Arbor, MI

M.S.E., Computer Engineering

GPA: 4.00/4.00

(expected) May 2027

B.S.E., Computer Science with a Minor in User Experience Design

GPA: 3.77/4.00 - Dean's List (all semesters), *Summa Cum Laude*

Aug. 2022 - Dec. 2025

- Coursework: Data Structures and Algorithms, Web Systems, Artificial Intelligence, Machine Learning

Technical Skills

Languages: Python, C/C++, JavaScript, TypeScript, SQL, R, Julia, HTML/CSS, Swift

AI Tools: Claude, Claude Code, GitHub Copilot, Model Context Protocol (MCP), LLM Agents, Agentic Workflows, Prompt Engineering, Object-Oriented Design

Frameworks/Libraries: React, React Native, SwiftUI, Vue.js, Node.js, Flask, PyTorch, Bootstrap, jQuery

Tools/Technologies: Git, AWS, CUDA, Hadoop, SQLite, REST APIs, Web Scraping

Experience

NetApp

San Jose, CA

Cloud Software Engineering Intern

Jun. 2026 - Aug. 2026

- Built an aggregate relocation POC for **Azure NetApp Files**, upgrading ONTAP HA Pairs and reducing failover upgrade times by ~30x (30 min → ~1 min); led cross-team collaboration to push to production deployment
- Presented results independently to **500+ engineers** during company-wide showcase
- Designed and implemented continuous integration test automation framework for NFS over TLS protocol using object-oriented design testing
- Added additional CIT testing for NetApp FabricPool and SnapMirror on OCI to test essential functionality

Software Engineer Intern

Jun. 2025 - Aug. 2025

- Built a Model Context Protocol (**MCP**) server exposing cloud resource metadata to LLM/AI agents, enabling IaC workflows that automatically generate Terraform templates for different scenarios.
- Developed a **Google Cloud NetApp Volumes** VS Code extension to streamline interaction for developers
- Integrated Copilot LLM into backend services on ONTAP OS for modular-level assistance through chat

University of Michigan

Ann Arbor, MI

Researcher (Michigan Institute of Data Science and AI in Society)

Jan. 2024 - May 2025

- Observed features of privacy-preserving techniques that result in noise-induced outliers and explored reasons for differences in the utility-privacy balance, identifying correlations between algorithms and behavior.

Knexus Research Institute

Oxon Hill, MD

Research Intern

Jun. 2023 - Aug. 2023

- Analyzed synthetic data in an archive of **450+** deidentified data samples for NIST Program
- Evaluated outliers in diverse populations to highlight algorithms that were vulnerable to known privacy issues

Publications

NeurIPS 2023 - Sen, A., Task, C., **Kapur, D.**, Howarth, G. S., and Bhagat, K. (2023). Diverse community data for benchmarking data privacy algorithms. *Thirty-seventh Conference on Neural Information Processing Systems Datasets and Benchmarks Track*. <https://openreview.net/forum?id=1ODvxEwsGk>

Projects

Distributed Search Engine

- Built a search engine with separate Index/Search servers to handle concurrent requests with Hadoop logic
- Designed a REST API that handles distributed search queries across index segments using multi-threading

Recipe Rating Predictor - (recipe.dhruvk19.com)

- Built an ML (scikit-learn) pipeline on ~800K records, feature engineering, and baseline benchmarking

ClashBot - Clash of Clans Discord Bot (github.com/dhruvk19/ClashBot) for **300+** users

Activities

VP of Operations at Tau Epsilon Kappa (Professional Fraternity), MHackers - ML, Michigan Data Science Team
