EDUCATION

University of Michigan

M.S.E., Electrical and Computer Engineering

Ann Arbor, MI

expected May 2027

- GPA: 4.00 / 4.00

B.S.E., Computer Science (Minor in User Experience Design)

Aug. 2022 - Dec. 2025

- GPA: 3.77 / 4.00, Dean's List (all semesters), *Summa Cum Laude*

Selected Coursework: Web Systems, Computer Systems and Security, Agentic AI implementations, Databases Systems

PUBLICATION

NeurIPS 2023 - Sen, A., Task, C., **Kapur, D.**, Howarth, G. S., and Bhagat, K. (2023). Diverse community data for benchmarking data privacy algorithms. *Thirty-seventh Conference on Neural Information Processing Systems Datasets and Benchmarks Track*. <https://openreview.net/forum?id=1ODvxEwsGk>

EXPERIENCE

NetApp

San Jose, CA

Cloud Software Engineering Intern

Jun. 2026 – Aug. 2026

- Implementing CIT (continuous integration tests) for **Azure NetApp Files** on NFSv4.1 over TLS data transmission
- Integrating Copilot LLM into backend services on ONTAP OS for modular-level assistance through chat participant

Software Engineering Intern

Jun. 2025 – Aug. 2025

- Developed a Google Cloud NetApp Volumes VS Code extension to streamline interaction for developers
- Engineered IaC generation workflows, auto-generating Terraform templates for different scenarios
- Built Model Context Protocol (**MCP**) server to expose analysis of cloud resources metadata to LLM/AI agents

University of Michigan

Ann Arbor, MI

Researcher (Michigan Institute for Data and AI in Society)

Jan. 2024 – May. 2025

- Observed features of the privacy-preserving techniques that result in outliers due to noise, and explored reasons for these differences in the balance between utility and privacy identifying correlation between algorithms and behavior

Knexus Research Corporation

Oxon Hill, MD

Research Intern

Jun. 2023 – Aug. 2023

- Explored behavior of data deidentification in the Collaborative Research Cycle NIST Program
- Analyzed synthetic data in an archive of over **450** deidentified data samples produced by the NIST Diverse Community Excerpts Benchmark Data using Python libraries Pandas and Numpy
- Evaluated outliers in diverse populations to highlight algorithms that were vulnerable to known privacy issues exemplified in other data analytics and outlined identifiable privacy concerns with outliers

PROJECTS

Distributed Search Engine

- Built a scalable search engine with separate Index/Search servers to handle concurrent requests with Hadoop logic
- Designed a REST API that handles distributed search queries across index segments using multi-threading

Recipe Rating Predictor (recipe.dhruvk19.com)

- Built an ML (scikit-learn) pipeline on **~800K** records with EDA, feature engineering, and baseline benchmarking

ClashBot - Clash of Clans Discord Bot (github.com/dhruvk19/ClashBot)

- Deployed a bot on a VPS to help automate events for **300+** users using REST APIs

SKILLS & ACTIVITIES

Languages: Python, C/C++, R, Julia, SQL, JavaScript, TypeScript, Swift, HTML/CSS

Frameworks and Technologies: React Native, SwiftUI, React.js, REST APIs, Bootstrap, jQuery, Vue.js, PyTorch, AWS, Node.js, SQLite, CUDA, Hadoop, Flask, Web Scraping, Git

Clubs: Vice President of Operations at Tau Epsilon Kappa (Technological Professional Fraternity), MHackers-ML, Michigan Data Science
